

Many times normal pet odor decontamination procedures remove the yellow staining that accompanies many pet urine deposits. But when it doesn't, reach for Urine Stain Remover with Hydrocide. Simply spray the stain full strength and allow it to work for 3 to 8 hours and the stain will disappear. This is a product that will deliver truly amazing results and there's no need to neutralize or rinse. Urine Stain Remover goes on at an acidic pH of 5.4 but self-neutralizes to a neutral pH of 7 as it dries.

Urine Stain Remover now contains the odor encapsulating and bonding power of Bridgepoint Hydrocide so as it neutralizes and eliminates the yellow stain, it also neutralizes the odor.

- New, improved formula utilizing strengths of Stain Zone formula
- Hydrocide added to facilitate odor neutralization, especially on minor urine spots.
- For minor spots, cleaning and pet odor application of new formula is all that is needed.

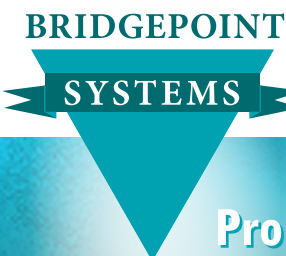

### DIRECTIONS:

1. Thoroughly clean and clear water rinse stained area using a Water Claw to flush out organic source material.
2. Apply Bridgepoint's Urine Stain Remover with Hydrocide full strength directly to urine stain. Be aware that its use will limit the capability of any remaining bacteria/enzyme products.
3. Allow three to eight hours for stain to disappear (depending on temperature and conditions)
4. Repeat treatment as necessary to remove the stain. For any remaining odors, use Hydrocide, Bio-Modifier or Bio-Charge.

RTU pH:5.4

Dilution Ratios: RTU

Available in Gallons and 4 x 1 gallon cases

Part # CS18GL
