

RESUSCITATE™

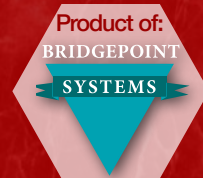

RESTORATIVE STONE, TILE & GROUT CLEANER

Organic Acid Stone, Tile & Grout Restorative Cleaner

RESUSCITATE

Removes hard water spots, soap scum, and efflorescence not removed by alkaline cleaners.

RTU ph - 1.0 - 1.5

Contents: One U.S. Gallon (3.79 Litres)

- Restorative organic acid cleaner for stone, tile, & grout
- Cleans away hard waterspots, soap scum and efflorescence
- Safer than aggressive acids while still extremely effective
- Use only as directed
- Protect sensitive surfaces and stainless steel from overspray
- Biodegradable formula

DIRECTIONS FOR USE:

Pre-cleaning considerations
Read entire label before using. Use only as directed. Pretest each surface in an inconspicuous area to determine suitability. Test in small inconspicuous area to determine required dilution and results. Be sure all surfaces to be cleaned are swept or vacuumed to remove loose debris. Heavy duty dilution may darken some surfaces. This acid-based cleaner will etch or damage marble, limestone and travertine surfaces. It will not typically etch or corrode most metal surfaces, including stainless steel. Avoid skin and eye contact. Ensure work area is well-ventilated during application and until surface is dry. Keep children and pets out of the area during application and drying. As a general rule, mask off all surfaces which could inadvertently come in contact with spray, especially metal and baseboards..

Application Procedures

1. For heavy duty soiling, mix 1 part solution with one part water in pressure sprayer (64 ounces of solution with 64 ounces of water). For lighter duty soiling, mix 1 part solution with 4 – 16 parts water in a pressure sprayer (8-32 ounces of solution with a gallon of water).
2. Apply mixed solution with a clean mop, towel, sponge or pressure sprayer. Avoid applying cleaner on unintended surfaces.
3. Agitate with a brush as needed. Brush agitation assists the cleaning process.
4. For best results, extract and rinse thoroughly with SX-12 Rotary Extraction Tool or Gekko Wand. If not available, remove solution using a sponge, wet/dry vacuum or damp mop.
5. Rinse area well with clean water and wipe dry. Thoroughly rinse all metal surfaces with clean water. For grout, neutralize with solution of Spinergy Stoneperfect mixed at 1 to 32 dilution with comparable dwell time, and rinse thoroughly. It is important to neutralize the residues of the acid from the grout to prevent gradual degradation of the grout cleaned.
6. It is recommended for stone and grout to re-seal the cleaned area with Spinergy Duraprotect Impregnating Sealer or Spinergy Solidrock Premium Sealer.

Removing Efflorescence:

Apply sparingly to small areas of grout and agitate with a brush. Limit dwell time by extracting immediately and completely with water. Dry quickly with air movers as excess moisture is the cause of efflorescence.

CONTAINS

Water (Cas #7732-18-5), Proprietary organic acid, Proprietary surfactant blend, fragrance.

INSTRUCCIONES DE USO:

Recomendaciones de limpiado
Lea toda la etiqueta antes de usarse . Uselo solo como se indica. Haga una prueba preliminar de la compatibilidad del producto, en un area poco visible. Asegurese que las areas que va a limpiar esten barridas o aspiradas . Si la solucion esta muy concentrada puede oscurecer algunas superficies. Este acido limpiador puede danar el marmol, o algunos otros pesos. No mayoría de casos no corroe el metal, incluyendo el acero inoxidable. Evite el contacto en la piel y en los ojos . Asegurese que el lugar donde va a trabajar este ventilado durante la aplicacion del producto hasta que se seque . Recomendamos que cubra el suelo y los metales para que no les caiga de este producto.

Modo de empleo

- 1- Para manchas muy penetradas mezcle 1 parte de solución con 1 parte de agua usando el rociador con presión (64 onzas de solución con 64 onzas de agua). Para manchas ligeras mezcle 1 parte de solución con 4 – 16 partes de agua usando el rociador de presión (8-32 onzas de solución con un galón de agua).
- 2- Aplique la solución mezclada con un trapeador limpio, toalla, esponja o un rociador con presión
- 3- talle con un cepillo . el cepillo ayuda a una limpieza mejor
- 4- Para mejores resultados , extraiga y enjuague con una maquina SX-12 Extracción Rotatoria o Gekko Wand. Y si no tiene una use una esponja para remover la solución.
- 5- Enjuague el área bien con agua limpia y un trapo seco. Enjuague bien todas las superficies de metal con agua limpia . Para grout , neutralize con solución de spinergy stoneperfect mezclado de 1a32 partes dándole un poco de tiempo para mejores resultados , después limpie . Es importante neutralizar los residuos del ácido que puso en el grout para prevenir una degradación
- 6- Es recomendable para la piedra y el grout resellar el área limpiada usando Spinergy Duraprotect Impregnating Sealer o Spinergy Solidrock Premium Sealer.

Removiendo Eflorescencia:

Rocie en un área pequeña de grout y talle con un cepillo . Dele tiempo y extraiga inmediatamente y completamente con agua . Sequelo rápidamente con aire . El exceso de residuos es la causa de la eflorescencia.

IMPORTANT NOTICE TO PURCHASER: Seller's and manufacturer's liability for any and all losses or damages resulting from any cause whatsoever shall in no event exceed the purchase price of this product, with respect to which losses or damages are claimed. Before using, the user shall determine the suitability of this product for its intended use, and user assumes all risk and liability whatsoever in connection therewith.
