

Phoenix Dry Max

Ultra Compact Design, Big Performance

Ultra-Compact, Large Category, Integrated Handle and Wheels

The Phoenix Dry Max is 6% smaller than the closest dehumidifier and yet it still has an integrated handle and wheels as well as onboard storage for the power cord and condensate hose! The all-new Phoenix Micro-Channel condenser allows us to pack so much performance into such a small dehumidifier.

The feedback on the stacking of the AirMax was so positive we made sure to build superior stacking into the Phoenix Dry Max.

We've also added a new four line display which provides you with all the information you need to take readings directly from the home screen.

A new Status Bar is located at the top of the new control panel to give you instant feedback about the dehumidifier from across the room.

Remove only four fasteners and you have easy access to service the unit.

The new Phoenix Dry Max pairs perfectly with our industry leading AirMax. Together you have a compact, portable, stackable, rugged drying system.

Depth	21"	25"
Weight	63 lbs	65 lbs

Popular Accessories And Replacement Filters

4024936	Lay-Flat Duct 10" Round x 250' Roll
4037046	9" x 12" x 1" Merv 10 Filter

Patent Pending

Like every Phoenix, the Phoenix Dry Max features effective air filtration with a pleated media MERV-10 filter. A wire duct collar is integrated to allow for 10" lay-flat to be connected to the exhaust.

The 25-foot power cord and 33-foot condensate hose store conveniently inside the pocket on the top of the unit.

The Phoenix Dry Max continues the success of the Phoenix AirMax with some of the most innovative designs for the Restoration marketplace.
