

End Zone

Extraction Emulsifier and Neutralizer

End Zone

End Zone is a powerful extraction emulsifier that also neutralizes after cleaning AND uses encapsulating polymer technology to help prevent resoiling! This is a cutting edge technology that allows you to get carpets cleaner and help them stay cleaner longer—a major benefit to your customers.

End Zone's powerful surfactants emulsify tough soils including sand and other particulates that pre-sprays just can't remove. End Zone then neutralizes carpet to a slightly acid pH and its polymer technology helps prevent browning, wicking and resoiling.

Fibers are left squeaky clean in a neutral or slightly acid state, perfect for the application of carpet protector—without a separate step!

While End Zone will work with any prespray, it has been specifically designed to work together as a system with Zone Perfect Pre-Spray to deliver incredible cleaning results even on the most heavily soiled carpets!

And, End Zone is safe for use on all carpet fibers, works in hot or cold water and contains corrosion inhibitors to protect your equipment.

- Excellent acid side cleaner and rinse extraction
- Holds soil in suspension
- Uses encapsulating polymer technology to help prevent resoiling
- Added surfactants emulsify tough soils and particulates that presprays can't remove
- Corrosion inhibitors protect your equipment
- Stabilizes color, prevents browning and leaves carpets soft & refreshed

Part Number: CC05GL

4.5 - 5.0 RTU pH

Dilution Ratio: 4 oz./gal.

Contents: One U.S. Gallon (3.79 Litres)

Available in Gallons and 4 x 1 gallon cases, 5 gallon pails and 55 gallon drums

DIRECTIONS

Use for extraction only. Use Fab Set when neutralizing with mist.

For use with truckmount: Mix 1 qt. to 5 gal. of water and meter as usual depending on soil level.

For use with portables: Depending on soil level, mix two to four ounces to five gallons of hot water.
