

PROTEIN SPOTTER

BRIDGEPOINT SYSTEMS

Water-Based Alkaline Spotter

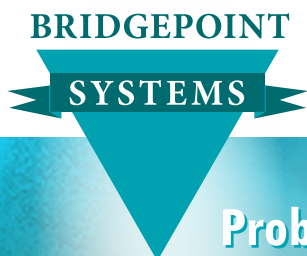

Protein Spotter gets the special stains other spotters don't: blood, vomit, egg and other protein-based stains. Put Protein Spotter on your toughest stains and rinse the chemical and the stain away together.

- Neutralizes acidic or oily soils.
- Great at pre-treating problem spots before cleaning process. Use when bidding a job to see the impact of alkalinity in cleaners specified carpet

DIRECTIONS

1. Identify type of stain if possible.
2. Scrape or blot up all excess soiling.
3. Always pre-test fabric for color fastness in an inconspicuous area.
4. Apply spotter - blot dry and repeat until no further improvement is noted. Rinse with water.
5. Do not rub to avoid distortion of the pile or texture of fibers.

Available in Gallons and 4 x 1 gallon cases
Available in Quarts and 12 x 1 quart cases

RTU pH: 10.5
Part # CS23GL
Part # CS23QT
