

MultiPhase

DEODORANT

RTU pH 5.0-5.5
1:4
Synthetic & Wool
Carpet & Upholstery

Triple Action Bonding, Encapsulating & Absorbing Odor Counteractant

MultiPhase attacks odors with a multi-faceted attack including pet urine, mustiness, and vomit. It works effectively on a broad spectrum of organic odors.

It is a binding, bonding, encapsulating, pairing, and absorbing deodorizer that will safely and effectively eliminate pet urine and feces odors.

- MultiPhase contains an industry favorite pleasant fragrance to leave the treated environment with a refreshed, deodorized smell. It can be used to effectively treat odors on any water safe surface including carpet, draperies, upholstery, hard surfaces and floors, pet beds, mattresses, and more. It does a fabulous job of treating general odors to help freshen up a total room.
- MultiPhase goes to work deodorizing immediately, making the rest of your cleaning job more pleasant.

Directions:

1. For best results, locate all areas which are sources of odor. Remove as much odor producing source material through effective cleaning. On large pet urine deposits, pre-treat area with CleanMaster UPS during cleaning. Then, saturate affected areas with mixed MultiPhase equal in proportion to the amount of odor producing material. MultiPhase must come in contact with the source of the odor to work most effectively. Pre-test all application surfaces for colorfastness before proceeding.
2. For most applications: Mix MultiPhase 1 part solution with 4 parts water. On severe urine contamination, you can use a more concentrated mixture or even straight, depending upon severity of the odor.
3. On urine contamination: Inject or saturate mixed MultiPhase directly into the carpet, backing, and cushion. Allow to dwell 5-20 minutes. Extract area thoroughly, preferably with sub-surface extraction tool.
4. For use as fogging deodorizer: Mix 1 part MultiPhase with 3 parts of water. Protect water sensitive surfaces. Never inhale atomized or fogged solutions.
5. As a cleaning additive: For portable extractor, mix 2 ounces of MultiPhase with each gallon of pre-mixed extraction detergent or neutralizing rinse. For truckmounted equipment, mix 1 quart of MultiPhase with 5 gallons of pre-mixed concentrated extraction detergent or neutralizing rinse. For low moisture encapsulation cleaning, mix two ounces of MultiPhase with each mixed gallon of encapsulation solution.

Available in: 1 Gallon; Case of 4 x 1 Gallon,
5-Gallon Bucket
Part # 800-500
