

Rust Remover (B198)

Safe and effective rust spot remover

FOR PROFESSIONAL USE ONLY

Thickened formula keeps product in contact with rust spot

APPLICATION: Spotter

DESCRIPTION

Unique, powerful, cream-like gel is a time-released formulation that is extremely fast-acting and designed for use on synthetic carpet, fabrics and hard surfaces such as porcelain and ceramic. Its flexible squeeze-bottle container allows you to apply Rust Remover directly onto the stain, and the creamy formula coats the stain for a potent stain removal process. The thickened formulation keeps Prochem Rust Remover in contact with the spot for fast, efficient removal.

FEATURES

- Time-release system for safe, effective rust removal
- Unique gelled formula keeps spotter in contact with spot
- Safer than products based on hydrofluoric acid, which can etch glass and cause injury
- Easy to ship, reduced shipping costs, less hazard for the cleaner and customer. Separate neutralizer product not required.
- Use on carpet, hard surfaces and most upholstery fabrics
- Available in easy-to-use pint squeeze bottle

WHERE TO USE

Carpets: Removes rust spots left by furniture glides.

Upholstery: Removes rust spots from many upholstery fabrics. Gelled formulation inhibits over-penetration into fabric. Always pre-test surface for colorfastness or undesirable effects.

USE DILUTION: Ready to use – No mixing necessary.

USE DIRECTIONS:

Pre-test carpet or fabric in an inconspicuous location for colorfastness.

Ready to use, do not dilute. Shake gently before using.

1. Apply Prochem Rust Remover directly to the rust spot. Avoid over-application.
2. Allow several minutes contact time. Agitate gently during this time using a brush or scraper (do not use fingers).
3. Blot or extract area with clear water or detergent solution. Repeat steps 1-3 if necessary. Groom carpet or fabric to align fibers.

USAGE TIPS:

- DO NOT use on fiberglass or metallic fibers.
- Old rust spots will require longer contact time than fresh rust spots.
- Agitation speeds rust removal by keeping fresh material in contact with spot.
- Separate rinse step is not needed when Rust Remover is used just before extraction cleaning.
